On the pests of one of the old beds in the mansion at Mount Vernon are small glass knobs with sockets drilled into them, which fit little spikes, but do not fasten on. It is perfectly natural for visitors to place their hands upon the knobs, and those who do immediately perceive that they can be taken off. The next step is to slip them quietly into the pecket and carry them away as relies of the sacred place. Although an attendant is employed to watch this room, there are so many visitors that it is impossible for him to prevent such pillering, and the glass knobs have to be replaced two or three times a week during the busy senson, but that costs very little trouble and expense. A factory near Pitisburg turns them out for 30 cents a gross, and Mr. Doige is in the habit of ordering a barrel of them every spring. There are several thousand of these glass knobs scattered over the world, in muscums and private collections of mementos and historical relies. Many more are doubtless concealed for reasons of conscience and fear of discovery, but the guilty persons need have no concern. The original knobs that belonged to the hed are safely laid away in a vault.—Chicago Record.

WAS THE MAN INSANE

Speculation Concerning Saunders' Death.

A BROTHER'S STATEMENT

He Was Almost Killed by a Fall Fifteer Years Ago, Thought He Heard a Burghar, Business Men's Association.

Speculation was at high tide yester day concerning the cause of the tragic ending of the life of Samuel Saunders, a full account of which was given in

This was in one of the big retail house on the trustic custing of the life of Samuel Saunders, a full account of which was given in the backow of Grace church. The man was unmistakably a farmer—not the rounded, successful and assertive farmer of the Dulty Press.

The modive atter led him on to a death so cerebile is still, however, a mystery. There may be those who know what it was, but if so they are keeping their scoret well. He was evidenally free from cares of a business nature. There seems to be no doubt that he had medianced self-destruction for some dime, and it is probable, as stated yesterday, that he had ned as everal boxes. The customate two previous attempts to patient in the points to the first failure, and the envelope labelled strochmen, found in the suicide's room, which did not come from Congdon's drug store, like that which correlated the poison that killed in a poison is predicted in the poison state which correction in the poison which correction in the poison of a busy flapinck, and bay flapinc had in the poison structure of a gaugecock seein his reflection in the polisis of a boot that a high plant in a picture of a gaugecock seein his reflection in the polisis of a boot that a nigroup land of a boot that a nigroup land in the poison state which corrections in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of a boot that a nigroup land in the polisis of the poli welche labelied strychräme, found in suicide's room, which did not come om Congdon's drug store, like that tich cartained the poison that killed it die from the descend. Why he did to the from the descend. Why he did to the from the descend. Why he did to the from the descend which camber of the second of the mouseacting ects of the strychnime, of which he k too much. His suffering was also a drugght and in an hour or so he was well as ever. The following day he at 100 work without sixing cause for picken to anyone that he had at the proof of the strychnime of the town well as ever. The following day he at 100 work without sixing cause for picken to anyone that he had at the proof of the strychnime of the transferred from the book departion when the was the same patient, the end attempted suitable. At his place on the 1 Point cars he was the same patient, the end attempted suitable. At his place on the did fit of insanity. In fact, on the bernant the declaration that he died aft of insanity. In fact, on the her hand, there is everything to arround the declaration that he died aft of insanity. In fact, on the her hand, there is everything to servore it and to point with almost solute certainty to a clear, desilb at purpose to take his own iffe her hand, there is everything to servore it and to point with almost solute certainty to a clear, desilb at purpose to take his own iffe her hand, there is everything to more of the family, he says, has er been affected in that way Fitty years ago Sem fell while skating and for a time his life was despaired, but his mind was not impaired by a accident.

Him was divided at the poison day accident.

**Him was divided in the did and the propose of the family, he says, has er been affected in that way Fitty years ago Sem fell while skating of or a time his life was despaired, but his mind was not impaired by a accident.

In Saunders' case there is nothing to warrant the declaration that he died in a fit of insanity. In fact, on the other hand, there is everything to disprove it and to point with almost absolute certainty to a clear, deliberate purpose to take his own ife. His brother, John H. Saunders, who came yesterday and took the body to Northampton county for interment, denies that he was insane. No member of the fam'ly, he says, has ever been affected in that way Fitteen years ago Sem fell while skating and for a time his life was despaired of, but his mind was not impaired by

man that would marry a fine lady without asking questions.

After many repulses from poor fellows
who were not desperate enough for such a
venture he met with an excise man, who
said he could not be in a worse condition than he was, and accordingly went
with the innke per and made a tender of
himself, which was all he had to bestow
on the lady, who immediately went with
him to one who gave them a license and
made them man and wife, on which the
bride gave her spouse £200, and without
more delay left the town and bridegroom
to find out who she was or unriddle this
strange adventure. Soon after she was
gone two gratemen came into the town
in full purseit of her. They had traced
her so far upon the read, and finding the
into all the particulars of her conduct, and
on hearing she was married gave up their
pursuit and turned back.

Truly, a noble dame, one worthy of a
full length portrait in the wither. The bakery business forme ly conducted by Messrs, A. C. Bush & Cohas been acquired by Messrs Messick & Guy. Parties owing and owed by the concern will please settle their accounts promptly. paint; Never hourn the war wuz done an don't kee

on nearing she was married gave up their pursuit and turned back.

Truly, a noble dame, one worthy of a full length portrait in the gallery constructed by Thomas Hardy!

Why did this noble dame offer herself to the first comer? And why were the respectable males of the town so backward? There was no hint of scandal. Who were the pursuers? Did she wish by one sudden marriage to escape one deliberately contrived and repugnant? Was the excise man a pretty fellow in spite of his abject condition? Did she ever see him again; Did she ever regret that she had not braved the world and lived with him? Perhaps the memory of her apparition haunted him; perhaps it roused him to doughty deeds. It's a pity that Mr. Hardy has not accounted for her action and her fate with his grim ireny.—Boston Journal.

KEPT AT IT WHILE ASLEEP.

Mean Trick Which an Engineer Played on His Fireman.

Mean Trick Which an Engineer Played on His Fireman.

"We have some pretty long stretches of duty," said a locomotive engineer the other day, "and it isn't an uncommon thing for a man to go for 48 hours without sleep. Of course it isn't the best policy for the railroad company to allow such a thing to happen, but sometimes it can't be belped. It would be a pretty serious thing for an engineer to go to sleep at his post. You think it would be hard for a man to sleep under such circumstances, eff.

"Well, I never heard of the engineer doing it, although sometimes they come pretty near to dozing, but my own fireman went sound asleep during one of my runs recently. The poor fellow had been kept on the jump for three days without a wink of sleep, and when we started on the run in question he was simply dead tired. He managed to keep awake, however, until we reached the outskirts of the city. It was he pace then to ring the bell continuously until we get into the trainyard. He kept that bell going with regularity, and I wendered at his vitality. When I ran my engine into the roundbouse, he never moved out of his sent, but still yanked the bell topo. Then I saw that he was asleep. I called the other fellows, and we watched him for two or three hours sleeping away and yet pulling dutifully as the bell. When we finally woke him up, his arm was sore, and he was mad as a batter."—Philadelphia Record.

"Already Hal had gone back a few steps and then gliding forward to the brink of the shoot paused a moment and was off. Breathless we watched his swiftly moving figure as it approached the jump. He gathered himself together for the spring as he approached the top, and the next moment we saw him hurled, as if from a catapult, into space. Far out over the frozen hillside we saw him dart, and as last he struck, swayed a moment, and then quickly recovering himself sped swiftly over the lake. Stopping himself se quickly as possible, he turned and running back called out: 'Don't try it! It's too hard!"

The Tarpon of Florida Waters.

The tarpon frequently attains a length of 7 feet or more, with a weight perhaps of more than 200 pounds. Such magnificent specimens, however, are seldom taken upon hand taskle, and most anglers are willing to regard a fish weighing 100 pounds as a very satisfactory catch.

The tarpon is very closely related to the herring, and besides its great size, strongth and gameness it is remarkable for its emorphous scales, some of those from a fish weighing 160 pounds measuring 4 inches across. Over the greater part of the bedy the exposed portion of the scales is covered with an epidernis which resembles (posted silver, while the back of the fish is green and beautifully iridescent. The lower jaw projects strengly, a sort of indication of the resolute disposition of the fish. The last anys of the dersal fin are prolonged into an appendage of considerable length.

The tarpon is not, in Florida at least, regarded as good eating, the flesh being coarse and dark; consequently when after great resistance a fish has been brought to land it is delivered over to the waiting buzzards or to the taxidernist — Outing

London as a Newspaper Center.
It is estimated that from 50,000 to 100,000 words per diem are sent as special reports from "our London correspondents" to the provincial newspapers, without inthiding the traffic over "private" wires based by newspapers for their own use.

One pound of sheep's wool is capable of roducing one yard of cloth. The Worst Victim.

"Dar ain' no wuss victim ob misplaced confidence," said Uncle Eben, "dan de man who gits ter thinkin he knows ev'ry-thing."—Washington Star.
